

Ace Mobile Wash

Specializing in Mobile High-Pressure Cleaning Since 1982

Reliable. Experienced. Professional. We expertly power-wash your vehicles and exterior surfaces, and we offer additional related services as well. Count on us for a thorough job — every time.

Vehicle Power-Washing

- **We wash any vehicle.** Buses, trucks, cars — let us clean your entire fleet.
- **We work at your location.** Our trailer-mounted units enable us to come to you to professionally clean your vehicle.
- **Save time and money.** You avoid the hassles, time, and expense of dispatching a vehicle for washing. Our mobile service means you don't have to pay an employee to take a vehicle to be cleaned. We come to you, eliminating all the risks involved when your vehicle is out on the road.
- **Deionized water ensures spot-free drying.** Unlike most of our competitors, we use special deionized water to leave your vehicle spot-free and shining end-to-end. Our biodegradable soap is easy on the environment.
- **Power-washing yields the best results.** Our 2,500- to 4,000-psi power-washing equipment is our tool of choice for getting your vehicle perfectly clean and avoiding harmful abrasives.

Exterior Surface High-Pressure Cleaning

- **We clean all exterior surfaces.** Let us keep your pavement, parking lots, sidewalks, and driveways clean and stain-free.
- **Eliminate every stubborn stain.** Exterior surfaces create an impression. They are a reflection on you, so let us take care of cleaning those hard-to-remove stains from oil or other spills.
- **Our service is flexible and reliable.** You might require a one-time clean-up or a monthly, weekly or daily service. We work according to your schedule and deliver predictable results.
- **Heated high-pressure cleaning brings results.** We can heat our wash water to a scalding 350 degrees, and we combine it with our 2,500- to 4,000-psi power-washing equipment to eliminate all stains from any surface.

Additional Services

- **Epoxy surface coating** — We use our high-pressure cleaning equipment to clean your concrete, and then we apply a high-quality epoxy surface coat.
- **Commercial filter cleaning** — We'll make sure your restaurant and appliance filters and air conditioning coils are clean and ready for continued use. If you have **any specialized need for high-pressure cleaning**, call to see how we can help.

Emergency? We're available around the clock at 602-272-4442.
